TROPHY CARE TIPS

1. Avoid placing your trophy above a fireplace or directly in front of a heat vent or any other heat source.
2. Avoid placing directly in sunlight, which can cause color fade.
3. Avoid placing your trophy next to a moisture source such as an aquarium.
4. Dust your trophy lightly with a feather duster periodically.
5. We offer a cleaning and restoration service. This can bring older outdated or poorly mounted trophies back to life. Price ranges, depending on the amount of work to be done.
